

ABSTRACT

Antisense compounds, compositions and methods are provided for modulating the expression of phosphoinositide-3-kinase, regulatory subunit 4, p150. The compositions comprise antisense compounds, particularly antisense oligonucleotides, targeted to nucleic acids encoding phosphoinositide-3-kinase, regulatory subunit 4, p150. Methods of using these compounds for modulation of phosphoinositide-3-kinase, regulatory subunit 4, p150 expression and for treatment of diseases associated with expression of phosphoinositide-3-kinase, regulatory subunit 4, p150 are provided.
